

STAFFORD TOWNSHIP: TERRAPIN CONSERVATION PROJECTS

Your efforts are important to us!

Hi, we're Project Terrapin from the Marine Academy of Technology & Environmental Science, Manahawkin, NJ. We're monitoring diamondback terrapin populations and protecting them as part of a conservation effort. Your observations and protection of terrapin nests is important. If you would like to help protect terrapin nests, please use a nest cage that you can obtain from:

Mill Creek Road – The Kosa Family

Newell Avenue – TBD/MATES Project Terrapin

Cedar Run Dock Road- MATES Project Terrapin

If you see a terrapin nesting on land, in water, or on the road, let us know through our website reporting form!

 **Center for Research and
Applied Barnegat Bay Studies**

Collective Project Areas

—
Mill Creek Road
Newell Avenue
Cedar Run Dock Rd.
Forsythe Refuge at
Cedar Bonnet Island
—

Protection of terrapin
nests during the
nesting season (late
May – July)
—

Habitat
enhancement by
making your property
“terrapin friendly”
—
